ICS 0885-88
20 July 1988

26 JUL 1988

MEMORANDUM FOR: Chief, Technical Security Group
Physical and Technical Directorate, Office of Security

ATTENTION:

FROM:

Community Counterintelligence and Security
Countermeasures Office, Intelligence Community Staff

SUBJECT: Request for Contributions to Security Publication (U)

1. The DCI Security Forum has assumed responsibility to publish a new version of something akin to "A Study of Harassments and Provocations." I have attached copies of previous publications. Since the disestablishment of SECOM there exists no other body under the office of the DCI which has taken the responsibility for this action. The DCI Security Forum is the logical organization to assume this and many other functions previously managed by SECOM.

2. In our May 1988 meeting of the Forum we asked each of the representatives of the Intelligence Community to contribute vignettes for assembly and compilation into a new publication. Some, but not all contributions have been received. The CIA's Policy and Plans Staff forwarded six items for our use but we note that your office was not asked for contributions. I discussed this with [redacted] of P&PS and she has no objection to our direct request to you.

3. It is requested that you review the attachments for the general content and format with the objective of determining if you have some incidents which can be related in a way to limit the classification to SECRET and below or unclassified. Depending on the volume and nature of contributions received, we will publish either a classified version, an unclassified (OFFICIAL USE ONLY) version, or perhaps both. All options have been exercised in the past. Because of your capacity as a liaison officer

with other Community agencies/departments, if you are aware of incidents which occurred involving other organization personnel and those organizations are willing to share their experiences for this publication, we would appreciate receiving them. By no means should this be considered a tasking to you. We only ask if you can conveniently collect something useful, we would like to have it. Considering all the foreign travel that the TSCM personnel conduct, we are sure there have been subtle or otherwise incidents of harassment and provocation that might be worth recording for educational and instructional purposes. Thanks in advance for any contributions you can offer. (U)
